SUMMARY

Data Engineer with 5+ years of experience in full-stack and enterprise data solutions, specializing in Azure and scalable architecture. Proven success in delivering high-performance platforms that enhance operational efficiency across logistics, finance, and AI-driven initiatives.

EXPERIENCE

FedEx Freight | Data Engineer III | 40 hours/week | Mar 2026 – Present

- Architecting a cloud-native analytical platform on Azure Kubernetes Service (AKS), evaluating service trade-offs to re-engineer legacy commercial pricing workflows for high-volume OLTP data.
- Defining data governance standards and building SQL pipelines to transform raw logistics data into trusted, near-real-time insights for strategic leadership KPIs.

FedEx Dataworks | Data Engineer III | 40 hours/week | Feb 2023 – Feb 2026

- Collaborate with data scientists and business teams to migrate image classification platform from legacy Dataiku infrastructure to Azure achieving $4M in licensing and cost savings.
- Built conversational-AI infra for enterprise GPT models, supporting 12k+ concurrent users that improve workforce planning and operational readiness.
- Developed an executive Power BI dashboard for weekly reporting that cut exec decision time from 3 days to 1 day.
- Built enterprise platform for global unit loading quality assurance and damage tracking, delivering $1.6M in annual operational savings.
- Mentored junior engineers on scalable data modeling and engineering best-practices, improving code quality.

FedEx Corporate Services | Full Stack Developer III | 40 hours/week | Feb 2021 – Feb 2023

- Implemented a modernized payment application using Java (REST API) and Angular that increased efficiency in customer support operations.
- Led production and test support initiatives as a Subject Matter Expert (SME) that resulted in a 40% decline in defects.

Iowa State University | Systems Analyst I | 40 hours/week | Jun 2020 – Jan 2021

- Designed and implemented web interfaces based on responsive design and Section 508 compliance standards using JavaScript, PHP, and MySQL.
- Researched and documented machine learning-based techniques for research projects.

SKILLS

Technical: Python | Java | SQL | Apache Spark, Kafka | Azure | AWS | Databricks | Kubernetes | Terraform | React | Flink | Angular | Git | Generative AI, Prompt, and context engineering | Lucidchart | Postman

Leadership: Adaptability | Problem-solving | Cross-functional collaboration | Project planning | Stakeholder communication

Specialized: Data engineering | Data modeling & governance | SDLC | Agile methodology | Data science integration

EDUCATION

Texas Tech University (Lubbock, TX, U.S.A.), M.S. Computer Science, Aug 2018 — May 2020

Jawaharlal Nehru Technological University Hyderabad (Hyderabad, Telangana, India), B.Tech. Computer Science and Engineering, Sep 2014 — Apr 2018
